☐ Responsive to communication(s) filed on _____

☐ This action is **FINAL**.

☐ Since this application is in condition for allowance except for formal matters, **prosecution as to the merits is closed** in accordance with the practice under *Ex parte Quayle*, 1035 C.D. 11; 453 O.G. 213.

A shortened statutory period for response to this action is set to expire 3 month(s), or thirty days, whichever is longer, from the mailing date of this communication. Failure to respond within the period for response will cause the application to become abandoned. (35 U.S.C. § 133). Extensions of time may be obtained under the provisions of 37 CFR 1.136(a).

Disposition of Claim

☒ Claim(s) 1-17 is/are pending in the applicat

Of the above, claim(s) _____ is/are withdrawn from consideration

☐ Claim(s) _____ is/are allowed.

☒ Claim(s) 1-17 is/are rejected.

☒ Claim(s) 1-17 is/are objected to.

☐ Claims _____ are subject to restriction or election requirement.

Application Papers

☐ See the attached Notice of Draftsperson's Patent Drawing Review, PTO-948.

☐ The drawing(s) filed on _____ is/are objected to by the Examiner.

☐ The proposed drawing correction, filed on _____ is ☐ approved ☐ disapproved.

☐ The specification is objected to by the Examiner.

☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. § 119

☐ Acknowledgement is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d).

☐ All ☐ Some* ☒ None of the CERTIFIED copies of the priority documents have been

☐ received.

☐ received in Application No. (Series Code/Serial Number) _____

☐ received in this national stage application from the International Bureau (PCT Rule 17.2(a)).

*Certified copies not received: _____

☐ Acknowledgement is made of a claim for domestic priority under 35 U.S.C. § 119(e).

Attachment(s)

☒ Notice of References Cited, PTO-892

☐ Information Disclosure Statement(s), PTO-1449, Paper No(s). _____

☐ Interview Summary, PTO-413

☐ Notice of Draftsperson's Patent Drawing Review, PTO-948

☐ Notice of Informal Patent Application, PTO-152

Art Unit: 3738

DETAILED ACTION

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-17 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

As to the specification, Applicant has given no proof that the method as claimed would prevent "chest pain". Even though Applicant may attest that Applicant has received "beneficial effects" from drinking a large quantity of lime juice, this is not evidence in a scientific qualitative sense that ingesting a large quantity of lime juice or vitamin C would prevent any medically defined ailments. As noted in the top of page 1 of the specification, "symptoms [of chest pains] are most often induced by some physical or emotional stress ...". Any psychological effects from drinking lime juice, without physical proof of relief from ailments, will not be considered to be operative in a medically accepted and patentable method of treating a disease or the like. In fact, it is well known that "placebo effects" are common in individuals who believe that certain "medication" have alleviated their medical ailments, while in reality such "medication" were inactive and while in reality, placebos given to them instead. Applicant's condition as described in the specification, may be due to the wide belief that vitamin C, and related sources such as orange

Art Unit: 3738

juice, are good for the body. In fact, it has been shown that excessive vitamin C may damage the body to a certain extent.

Lastly, Applicant has not shown proof of what is considered the "active ingredients" as briefly discussed at the bottom of page 3 of Applicant's specification, or the "effective amount" as claimed in the claim language. Absent a showing of scientifically and reliable proof that the claimed method works as to the treatment of "chest pains", the present disclosure by Applicant is considered non-operative and non-enablement.

Claims 1-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. See the above paragraphs for details. Additionally, the following applies to individual claims.

As to claim 1, at line 4, it is not clear what "effective amount" consists of for the treatment as claimed.

As to claims 15 and 16, it is not clear what the "active ingredients" are for the treatment as claimed.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

Art Unit: 3738

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-7 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Singh et al., Langtry et al., Riemersma et al., or Dapcich-Miura et al. Applicant has merely claimed a method of treating "chest pain" by taking lime juice.

The above references all disclose a method of treating angina (medical terminology for a particular type of "chest pain") or related "chest pain" by taking vitamins, i.e., vitamin C, or fruit juices. Since Applicant has not shown the particular advantages over taking lime juice over other juices which contain vitamin C, and related vitamins and chemical composition, the use of lime juice is equated with the use of other citrus juices. Further, Applicant has not shown what is considered the "effective" substance and "effective" dosages of the juice in treating chest pain, the differences in dosage is treated as a "design choice" similar in the way a person increase or decrease medical dosages depending on the severity of the medical condition. Therefore, although the above cited references do not disclose the exact dosage of juice to take, it is inherent that the "effective" dosage or the dosage as claimed by Applicant is disclosed. In the alternative, it would have been obvious to one of ordinary skill in the art to have altered the dosage to be as

Art Unit: 3738

such claimed by Applicant, because this is a mere "design choice" depending on the severity of the medical condition.
